Protec is a corrosion resistant polypropylene material which exhibits excellent tensile strength and stiffness at elevated temperatures. Homopolymer polypropylene possesses excellent resistance to organic agents as well as electrolytic attack.

Compared to high-density polyethylene, Protec has a lower impact strength but superior working temperature and tensile strength. In addition, Protec is lightweight, stain resistant and has a low moisture absorption rate.

FEATURES:

- Lightweight
- Weldable
- Formable
- Machinable
- Excellent Electrical Properties
- Good Abrasion Resistance

APPLICATIONS:

- Laboratory Sinks
- Tank Covers
- Scrub Stations
- Acid Tank Linings
- Battery Cases
- Radio & Television Equipment
